## Principles and Insights

February 2016 - By Pas. Henry Francis

---

1. He that answereth a matter before he heareth, it is folly to him.
2. You must not judge your vision based on the response of the people about you, especially if their response contravenes God's desires.
3. When we relate to God only as Saviour then we elevate the fall of humanity above the original intent of God. Psalm 22 talks about the salvation of man, but Psalm 24 speaks about the majesty of God that existed before man was created.
4. The Principle of Preparation: One of the greatest tragedies of life is to have a leader of people who has not accepted God's preparation for that position.

### Life Discoveries

1. The most important discovery in life is that of the purpose of God for your life.
2. The next to it is to attend to the gifts and opportunities that He has given you.
3. The next is to determine the methodology He prefers to use when He deals with you.
4. The next is to see the timing of what He is doing in relationship to it all.
5. All these should be documented and reviewed on a regular basis.
6. These should be worked into or become the guiding forces of your everyday activities.

### Resolution

- To establish things, patterns and processes that would cause my life to be fully effective and in accordance with God's purposes for me on an ongoing basis.
